

Interim Report Q1 2024

May 2, 2024

The Interim Report for the 1st Quarter 2024 for A.P. Møller - Mærsk A/S is hereby enclosed.

CEO of A.P. Møller - Mærsk A/S, Vincent Clerc, states:

“We have had a positive start to the year with a first quarter developing precisely as we expected. Demand is trending towards the higher end of our market growth guidance and conditions in the Red Sea remain entrenched. This not only supported a recovery in the first quarter compared to the previous quarter, but also provide an improved outlook for the coming quarters, as we now expect these conditions to stay with us for most of the year. However, we still anticipate the high number of new vessels being delivered during this and next year to eventually offset these factors and put the ocean markets under renewed pressure. We therefore relentlessly continue to pursue our cost agenda with the aim of rolling back the disruption linked cost in Ocean and restoring margins in Logistics & Services. This work on cost, helped by our strong value proposition, is crucial in supporting our customers through the ongoing volatility and build a more resilient business.”
