### Management Statement on the Annual Report

The Board of Directors and Executive Management have today considered and adopted the Annual Report of Maersk Insurance A/S for 2023.

The Annual Report of Maersk Insurance A/S has been prepared in accordance with the Danish Financial Business Act.

The Annual Report gives a true and fair view of the Company's assets, liabilities, financial position and result.

The Management Review includes a fair description of the development in the Company's activities and financial position as well as a description of significant risks and uncertainties which may affect the Company.

It is recommended that the Annual Report be adopted at the Annual General Meeting.

Copenhagen, 14 March 2024

### Independent Auditor's Report

#### To the Shareholder of Maersk Insurance A/S

#### Our Opinion

In our opinion, the financial statements give a true and fair view of the Company's financial position at 31 December 2023 and of the results of the Company's operations for the financial year 1 January to 31 December 2023 in accordance with the Danish Financial Business Act.

Our opinion is consistent with our Auditor's Long-form Report to the Audit Committee and the Board of Directors.

#### *What we have audited*

Maersk Insurance A/S's financial statements for the financial year 1 January to 31 December 2023 comprise income statement and statement of comprehensive income, balance sheet, statement of changes in equity and notes, including summary of accounting policies ("Financial Statements").

#### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the *Auditor's Responsibilities for the audit of the Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### *Independence*

We are independent of the Company in accordance with International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark. We have also fulfilled our other ethical responsibilities in accordance with the IESBA Code.

To the best of our knowledge and belief, prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No 537/2014 were not provided.

#### Appointment

We were first appointed auditors of Maersk Insurance A/S on 16 September 2011 for the financial year ending 31 December 2011. We have been re-elected annually by shareholder resolution for a total

## Maersk Insurance A/S

---

period of uninterrupted engagement of thirteen years including the financial year 2023. We were reappointed following a tender procedure at the general assembly on 30 March 2021.

### Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the Financial Statements for 2023. These matters were addressed in the context of our audit of the Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

<i>Key audit matter</i>	<i>How our audit addressed the key audit matter</i>
<p><b>Measurement of claims provisions</b></p> <p>The Company's claims provisions amount to a total of USD 135 million, which represents 26% of the total balance.</p> <p>Claims provisions are calculated as the present value of the payments, which the Company is expected to be liable to pay in connection with insurance events that have taken place on or before the balance sheet date exceeding amounts already paid in connection with these events. In addition, direct and indirect costs in connection with the settlement of claims are included in claims provisions.</p> <p>Claims provisions are based on accounting estimates and actuarial methods including complex models and assumptions regarding future events.</p> <p>The most significant assumptions relate to the timing and extent of future payments of claims which are based amongst others on historical claims data.</p>	<p>We performed risk assessment procedures with the purpose of achieving an understanding of it-systems, procedures and relevant internal controls relating to claims processing and insurance provisioning. In respect of controls, we assessed whether they were designed and implemented effectively to address the risk of material misstatement.</p> <p>We assessed and challenged the models, methods and assumptions used based on our experience in order to ensure that these are in line with regulatory and accounting requirements. This included an assessment of the continuity in the basis for the calculation of claims provisions.</p> <p>For a sample of claims we tested the calculation and the data used to underlying documentation.</p>

**Maersk Insurance A/S**

We focused on the measurement of claims provisions because these are significant for the Financial Statements and are based on accounting estimates and actuarial methods that include assumptions about future events.

Reference is made to the Financial Statements of "Accounting Estimates" and "Claims Provisions" in Note 1 and "Cost of claims net of reinsurance" in Note 4.

**Statement on Management's Review**

Management is responsible for Management's Review.

Our opinion on the Financial Statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the Financial Statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Moreover, we considered whether Management's Review includes the disclosures required by the Danish Financial Business Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Business Act. We did not identify any material misstatement in Management's Review.

**Management's Responsibility for the Financial Statements**

Management is responsible for the preparation of Financial Statements that give a true and fair view in accordance with the Danish Financial Business Act, and for such internal control as Management determines is necessary to enable the preparation of Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using

## Maersk Insurance A/S

---

the going concern basis of accounting unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

### **Auditor's responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

## Maersk Insurance A/S

---

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and, where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter.

## Maersk Insurance A/S

---

### Management's Review

#### Main activities

Maersk Insurance A/S was founded in 2011 as a captive for the parent company A.P. Møller - Mærsk A/S and affiliated companies. In 2023, the status of the Company was changed from a captive to a full insurance company.

Maersk Insurance A/S has license to conduct direct and reinsurance business for the insurance classes 6 (Fully comprehensive insurance for ships), 8 (Fire and natural forces), 9 (Other damage to property), 12 (Third party liability for ships), 13 (General liability) and 16 (Miscellaneous financial losses). In addition, Maersk Insurance in 2019 was granted permission to conduct direct and reinsurance business for insurance class 1 (medical) and 2 (accident) as well as reinsurance for life class 1c (only death and invalidity caused by bodily injury, including incapacity for work).

#### Insurance risk

The Company writes property and casualty risks mainly within the areas Marine, Logistics, and Terminals. The insurance risk for Maersk Insurance A/S is limited to risks within the insurance classes for which the Company holds a license. Claims are limited per incident and for several programmes also on a yearly aggregate. For property and casualty, the maximum net risk per event is USD 25.0m. Specifically for Marine, the maximum net risk per event is limited to USD 18.75m. For the insurance classes medical, disability, accident and life, the maximum net risk is USD 5.0m per event.

#### Development in activities and finances

The company's result for 2023 amounts to a profit of USD 56,651k (2022: profit of USD 53,485k). The result is higher than expected and is positively influenced by high underwriting profits for Marine and Terminals property and for Casualty as well as positive run-off related to Energy.

Gross earned premiums decreased by 20% compared to 2022 and reinsurance premiums decreased by 33%. The reductions in gross earned premium and in reinsurance premiums were mainly driven by lower Casualty, Marine, and Cyber premiums. Total cost of claims net of reinsurance decreased significantly compared to 2022, partly due to positive run-off results. Claims paid were higher in 2023 than in 2022 mainly as a result of higher payments related to Marine and Medical.

The company has in 2023 had investment activities which, according to the policy of the company, have comprised investment assets with a low risk profile. The company's investment assets have in 2023 primarily been placed in short term deposits and in a loan to the parent company. The result of investment activities increased significantly over 2022 due to the increase in interest rates and is considered satisfactory.

## Maersk Insurance A/S

---

The solvency capital requirement as of 31 December 2023 has been calculated to USD 91,757k (2022: USD 89,019k). The capital base amounts to USD 336,357 (2022: USD 282,556k). The solvency capital requirement has been calculated according to the standard method under Solvency II and the capital base has been made up according to the valuation rules under Solvency II.

The development in solvency ratio in the last 5 years is as follows:

2023	2022	2021	2020	2019
367%	317%	277%	315%	284%

The solvency ratio as of 31 December 2023 has increased compared to 2022 mainly due to higher capital available as a result of the high 2023 profit.

### Expectations for the future

For 2024 a modest profit is expected.

### Salary policy

The overall purpose of the company's salary policy is to support that management and significant risk takers work to promote a healthy and effective risk management of the company. The salary may thus not be of a magnitude or composition which entails a risk for conflict of interest or which does not harmonise with the company's wishes for protection of customers and investors.

Apart from this, reference is made to note 5 to the Financial Statements.

### Risk management

Reference is made to note 15 to the Financial Statements.

### Distribution of the profit for the year

The Board proposes that the profit for the year, USD 56,651k is transferred to equity.

### Social responsibility

For a description of the A.P. Moller - Maersk Group's work with social responsibility, reference is made to the home page [www.maersk.com/about/sustainability](http://www.maersk.com/about/sustainability).

### Data ethics

## **Maersk Insurance A/S**

---

### **Gender Equality**

In August 2022 the Board adopted revised targets for the diversity of the company's shareholder-appointed board members with respect to the underrepresented gender.

The Board believes that its members should be elected based on their combined qualifications and at the same time recognises the advantages of a board comprising a wide range of backgrounds such as global experience, style, culture and gender.

Based on this ambition the Board has defined a target to maintain at least a 40% share of the underrepresented gender on the Board.

As the Board today consist of 5 members, of which two are female, the target is currently met.

Currently Maersk Insurance has only one level of management below Board level. This level consists of the CEO and the Appointed Life-Actuary. The Board of Directors has set the target for this management level to consist of equal gender representation by end of 2026.

Further information on diversity can be found in the A.P.Moller - Maersk Sustainability Report which can be found on [www.maersk.com/sustainability](http://www.maersk.com/sustainability).

### **Audit committee**

The independent member of the audit committee with accounting and audit qualifications is Fatiha Benali. Fatiha Benali is Chief Financial Officer at LB Forsikring and has previously held the position as Senior Vice President, Claims at Tryg and prior to that Business Financial Officer at the same company and has experience from audit committee and Board in Danmarks Skibskredit A/S. Through these positions, Fatiha Benali has acquired a broad knowledge of finance, accounting and IT.

Total eligible own funds to meet the Solvency Capital Requirement (capital base) are as at 31 December 2023 USD 336,357k. The difference to equity as at 31 December 2023 of USD 334,173k is mainly caused by valuation differences in the Solvency II balance sheet.

**Maersk Insurance A/S**

---

**Notes****1 Accounting policies**

The Financial Statements are presented in accordance with the Executive Order no. 937 dated 27 July 2015 and changes in Executive Order no. 688 dated 1 June 2016 and Executive Order no. 1442 dated 3 December 2018. The Financial Statements cover the period 1 January 2023 – 31 December 2023 and are presented in USD which is the Company's functional currency.

The accounting policies remain unchanged from the Financial Statements for 2022.

**Recognition and measurement**

Income is recognized in the income statement as earned. Expenses incurred to achieve the earnings for the year are recognized in the income statement. Value adjustments of financial assets and liabilities which are measured at fair value are also recognized in the income statement, unless otherwise stated below.

Assets are recognized in the balance sheet when it is probable that future economic benefits will flow to the Company and the value of the asset can be measured reliably. Investment assets are recognized in the balance sheet using the trading date as date of recognition.

Liabilities are recognized in the balance sheet when, due to an event occurring before or on the balance sheet date, the Company has a legal or constructive obligation, and when it is probable that future economic benefits will flow from the Company and the value of the liability can be measured reliably. On initial recognition, assets and liabilities are measured at cost corresponding to fair value. Subsequent measurements are made as described for each individual item below.

The recognition and measurement of assets and liabilities take into account information received after the balance sheet date but before the presentation of the Financial Statements if such information proves or disproves circumstances prevailing on the balance sheet date.

**Accounting estimates**

In connection with the compilation of the Financial Statements, management make a number of accounting estimates. The most significant estimates relate to the following:

## **Maersk Insurance A/S**

---

### Claims provisions

#### *Individual claims*

Provisions for individual claims are based on information from fronting companies ensuring that the fronting companies and Maersk Insurance use the same claim amount. Of this amount Maersk Insurance will provide for its share of the total claim. Maersk Insurance assesses information from fronting companies against information which has come to the knowledge of management to ensure that claims provisions are based on all information available to the Company.

#### *IBNR and IBNER*

Based on principles approved by the Board, the Company will calculate IBNR and IBNER provisions. The principles used are on a yearly basis evaluated by the Actuary Function and the Board to ensure that these provisions are at an appropriate level.

#### *3rd party recovery*

Where it is anticipated that recovery is obtainable from a 3<sup>rd</sup> party, the recovery amount will be estimated based on all available and relevant information, including where possible advice from external lawyers. The estimation of expected recovery amounts will take the inherent process risk associated with such cases into account.

### **Conversion of foreign currency**

On initial recognition, foreign currency transactions are translated into the functional currency using the exchange rate prevailing at the date of transaction. Exchange differences resulting from translation at the exchange rate prevailing at the date of transaction and the exchange rate prevailing at the date of payment are recognized in the income statement as a financial item.

Receivables, payables and other monetary items in foreign currency, which are not settled at the balance sheet date, are translated at the exchange rate prevailing on the balance sheet date. The difference between the exchange rate prevailing at the balance sheet date and the exchange rate prevailing at the time when such receivables or payables arose or were recognized in the latest annual report is recognized in the income statement as a financial item.

### **Financial instruments**

Financial instruments are initially recognized in the balance sheet at cost and are subsequently valued at fair value. Positive and negative fair values of financial instruments are included in the income statement and are in the balance sheet included under other assets and other liabilities respectively.

## **Maersk Insurance A/S**

---

### **Income statement**

#### **Premium income**

Premium income net of reinsurance includes total charged premium for the accounting period (with deduction of premium ceded to reinsurance companies) adjusted for changes in premium provisions, corresponding to accruals according to the risk period of the insurance policies.

#### **Insurance technical interest**

Part of total results of financial operation relates to insurance operations and has been transferred to that part of the income statement. The transfer is a calculated yield of average total premium reserves net of reinsurance for the year. The interest used is based on relevant interest curves.

#### **Claims paid**

Claims paid is the amount of money paid for insurance claims. The amount includes expenses for survey and handling of claims and other direct and indirect expenses related to handling of claims.

#### **Received from reinsurers**

Received from reinsurers is the amount of money received from reinsurers for their share of insurance claims.

#### **Change in claims provisions**

Change in claims provisions is the difference between claims provisions at the start of the year and at the end of the accounting year. This also applies for the reinsurance companies' share of claims.

#### **Change in risk margin**

Change in risk margin is the difference between risk margin at the start of the year and at the end of the accounting year.

#### **Administration expenses**

Administration expenses are expenses incurred in connection with renewing and handling of the insurance portfolio.

#### **Reinsurance commissions**

Reinsurance commissions comprise commissions based on contractual rates and profit shares received from reinsurance companies.

#### **Investment income**

##### **Interest income, dividends etc.**

Includes interest income from bonds, other securities and loans.

## **Maersk Insurance A/S**

---

### **Value Adjustments**

Value adjustments comprises all value adjustments including exchange rate adjustments.

### **Administration expenses related to investment activity**

Costs attributable to trading in and management of the Company's investments are recognized as administration expenses related to investment activity.

### **Tax**

Maersk Insurance A/S is covered by the corporate taxation law § 11A (captive rule) which entails that the Company is taxed respectively obtains tax deductions to the extent that group payments of premiums etc. are taxable respectively are tax deductible by other companies in the joint taxation.

The Company is taxed jointly with A.P. Møller Holding A/S and this company's subsidiaries. The parent company pays the combined Danish tax of these companies' taxable income. The jointly taxed companies are included in the on account tax system.

Tax for the year is recognized in the income statement with the amount attributable to profit or loss for the year and is recognized in other comprehensive income with the amount attributable to other comprehensive income.

### **Balance sheet**

#### **Financial investment assets**

Bonds are measured at fair value (quoted price at closing) at the balance sheet date. Deposits with credit institutions are measured at face value. The Company does not have any investments assets where fair value measurement is based on non observable input (level 3).

#### **Reinsurers' share of insurance provisions**

Amounts receivable from reinsurers are measured at the amounts receivable related to premium and claims provisions in accordance with the reinsurance contracts entered into.

The claims provisions are discounted to the extent that it is expected that settlement will take place over a longer period of time unless the difference between discounted and non-discounted provisions is insignificant. When relevant, claims provisions are discounted using EIOPA's yield curve without volatility adjustment.

#### **Receivables**

Receivables are measured at amortized cost which usually equals nominal value less provisions for bad debt.

## **Maersk Insurance A/S**

---

### **Prepayments and accrued income**

Prepayments and accrued income include receivable interest and expenses paid before the balance sheet date but which relate to following years. Interest receivable also includes positive market value of FX derivatives. Negative market value of FX derivatives is included in other liabilities.

### **Premium provisions**

Provisions for premiums are provided to cover obligations and amounts for unexpired risk periods for insurance contracts in force. The Company makes use of the simplified method for calculating the provisions as described in §72 of the executive order.

### **Claims provisions**

Claims provisions are amounts to cover claims and costs on insurance events occurred in the accounting year or prior to that year.

The claims provisions are calculated as the sum of the amounts which the Company to the best of its knowledge expects to be liable to pay in connection with the insurance events occurred until the balance sheet date exceeding the amounts that have already been paid in connection with these insurance events. The claims provisions also contain amounts which the Company to the best of its knowledge expects to pay for direct and indirect costs in connection with resolving the claims. The Company also applies an IBNR provision to cover incurred but not yet reported claims and an IBNER provision to cover the risk that claims provisions are underestimated.

The claims provisions are discounted to the extent that it is expected that settlement will take place over a longer period of time unless the difference between discounted and non-discounted provisions is insignificant. When relevant, provisions are discounted based on the expected time of settling the claims using the risk-free EIOPA USD interest rate curve.

### **Risk Margin**

Risk margin is provided to cover the amount to be expected to pay another insurance company for assuming the risk of settling insurance obligations in addition to amounts already provided for in premium and claims provisions.

### **Current tax**

Current tax liabilities and assets are recognized in the balance sheet as tax calculated on the taxable income for the year, adjusted for tax paid on account.

### **Debt**

Debt is measured at amortized cost which usually corresponds to nominal value.

# Notes

### 15 Risk information

In Maersk Insurance A/S risk management is performed when the Board of Directors evaluates and decides on several types of risk according to the Danish Financial Business Act and the Companies Act. The nature of the risks are both financial and operational. The Company has prepared policies and guidelines for all significant areas in order to manage these risks

At the operational level it is mainly insurance risks that must be evaluated while at the financial level it is the investment risk.

The Company mainly assumes insurance risk within the A.P. Moller - Maersk Group, including subsidiaries, and as required for joint ventures and partner companies. Part of the risk is naturally associated with claims provisions where a technical provision is made. On top of this the Company allocates an IBNR provision to cover incurred but not yet reported claims and an IBNER provision to cover the risk that reserves for claims should be too low.

In the preparation of the financial statements estimates and judgments are exercised that affect the carrying value of assets and liabilities and the result. The most significant estimates are exercised in the measurement of technical provisions. In the measurement of technical provisions a number of assumptions and estimates are made, inter alia in connection with the calculation of expected claims payments and expenses on reported claims. Technical provisions also include an estimate of claims incurred that have not yet come to the Company's knowledge. These estimates are inherently uncertain and rests on a number of assumptions that may be affected by developments in practise and litigation, etc. Accordingly, the Company's actual liability for claims may be subject to material positive and negative deviations relative to the amounts initially estimated in the technical provisions.

In 2020 the company was on a precautionary basis put on notice on several policy years regarding a potential energy claim. The size of the potential claim and the affected policy years was uncertain. An agreement with the claimants was reached in 2023 and there is consequently no remaining uncertainty related to this claim.

For the investment area, the Board of Directors has drawn up an investment policy. The policy defines the types of assets in which the company may invest, how much risk can be taken within each type of asset and against one counterpart, and which counterparties that may be used. As stipulated in the policy, all investments made in other currencies than USD are hedged to protect the company against the exchange rate exposure. The overall objective of the policy is to ensure that the company adheres to the prudent person principle. Adherence to the investment policy is monitored on a current basis by management and the audit committee.
