

Group CEO Nils S. Andersen comment on the Annual Report 2007

“We are satisfied with the progress of the results, which form a good basis for our work on improving the company’s market positions and profitability. Maersk Line’s results are in isolation of course not satisfactory. However, it is worth noting that the earnings of the container business have improved significantly compared to 2006, and the expected positive result for the container business has been achieved.

A.P. Møller - Mærsk A/S is dependent on international market conditions and the outlook for 2008 is highly uncertain. We have confidence in the action plans of the Group for the years to come, and despite the difficult outlook of the global economy we expect to be able to continue the progress of the Group’s revenue and earnings in 2008.”
